

INSTABOOM/SOSEC TELEMATICS

REMOTE FLEET MANAGEMENT

Your Site, Your Way

We are committed to giving you dedicated service and support with your products, however you choose to interact with us. Our team's decades of skill and experience means we work with you to get a tailored outcome that best suits you and your site.

Adding a tracker to any **INSTABOOM** or **SOSEC** barrier instantly allows full remote management, proactive servicing and email alerts and notifications. Especially important when barriers are operating a safety critical GS6 role, the ability to receive live alerts and locations of over height vehicle breaches becomes an invaluable safety tool.

Available to purchase outright, each tracker also needs an annual data licence with app. access included.

INSTABOOM / SOSEC trackers are included free of charge to all hired units. Each user receives a custom login to the standard tracker platform, available in web portal mode or mobile version.

For more detailed integration with existing tracking platforms, the full API data can be made available on request.

Personalised dashboard.

Realtime location tracking.

Data overview for each unit.

Vehicle	000757
