

PALLET LIFTING TRAILER

The pallet trailer is a game-changing transport solution for pallets and mobile units, eliminating the need for forklifts or cranes. Its built-in lifting mechanism streamlines loading and unloading, saving time and effort.

Designed for versatility, it handles everything from SOSEC barriers to liquid tanks and camera masts with ease.

Available in multiple models with varying load capacities, its low centre of gravity ensures stable handling, while its compact design navigates narrow streets and city centres effortlessly. Built for tough conditions, it manoeuvres smoothly over rough terrain, making it indispensable for construction sites.

Engineered for safety, efficiency, and ease of use, this self-loading trailer delivers reliable performance in every environment.
